Marlon Savian

Software Engineer
Caxias do Sul Area, Brazil

Summary

Fascinated by computer programming since the 14 years, where I programming Bots for games I had played, this way I had my first contact with programming, and it let me to seek more knowledge.

I enrolled in the computer course at FTEC and after a few months I realized what I really wanted to do in my life, I had my first class of programming and I fell in love with this art.

After this experience, I found myself more and more involved in this area, because I like to much to be challenged and build new software's to test my knowledge

Since my first class of programming then until today more than 9 years have passed and my passion for development increased much,

what which provided me work on extraordinary projects and contact with incredible people that, many times made me see the reason why i choose this profession.

I am a developer who is passionate about new challenges who had a big thirst to know different business areas, I like to get me deeper into business and have direct contact with the end user to have a clearly undertand of the problem. I believe that this way I can understand better the problem of user and consequently wast less time to develop a great application, that answer exactly what as requested.

I am very grateful for all the experiences I had and especially all the people I was able to help, the software development allowed me to contribute to the improvement of processes in companies, to make life easier for users, making them both more productive and manage more value for them.

Experience

Argo Sistemas - Gestão Inteligente para Postos de Combustível
Software Engineer

April 2018 - Present (2 years 3 months)

Caxias do Sul, Rio Grande do Sul

Analysis and development of solutions based on the needs of the current fuel trade scenario.

Adjustments and new implementations of the company's main software in Microsoft .Net.

Direct contact with suppliers for systems integration and information sharing.

Development of several mobile solutions in the Xamarin language.

Grendene S/A

Software Engineer

February 2015 - April 2018 (3 years 3 months)

Caxias do Sul e Região, Brasil

Responsible for analyzing and developing solutions to facilitate and improve the production of the new shoe season.

I got to know several different sectors and develop solutions for all of them, I gained experience bringing solutions in production, exports, finance and also in engineering

TOTVS

2 years

Developer

September 2013 - February 2015 (1 year 6 months)

Caxias do Sul, Rio Grande do Sul

As a developer I was responsible for visiting clients, and together with business analysts to develop the best solution to the problem encountered.

I had the opportunity to participate in several important projects, among which I highlight the WMS of Mor. Company located in Santa Cruz do Sul, where I had the experience of being able to spend 1 year immersed in its culture, understanding the company's needs and developing a project that would revolutionize the way the company stores and distributes its products.

Trainee

March 2013 - September 2013 (7 months)

Caxias do Sul, Rio Grande do Sul

Dedicated to understanding and knowing the company's processes, I had the opportunity to take the Progress 4GL course and learn to program in this language.

After that, I started to develop improvements and corrections for companies in different sectors, such as manufacturing, tobacco, food trade, equipment trade.
